1-99 Construction Guide OSRS

Construction is one of the many skills available in Old School RuneScape (OSRS) that allows players to build and furnish their own player-owned houses. This skill can be both enjoyable and beneficial, providing various utilities, customization options, and a unique gameplay experience. In this comprehensive guide, we will explore the most efficient methods to level up from 1 to 99 in Construction, covering everything from materials needed to the best training techniques.

Understanding Construction in OSRS

Before diving into the training methods, it's essential to understand what Construction entails in OSRS. The Construction skill allows players to create furniture and various rooms within their houses. The skill is unique because it requires the player to gather materials and then use them to build items in their house. This process involves both a financial investment and the acquisition of raw materials.

Benefits of Training Construction

Training Construction offers numerous benefits, including:

- Customization: Players can design their houses to reflect their style and preferences.
- Teleportation: Certain furniture items, like the Teleport to House tablet, can facilitate quick travel across Gielinor.
- Increased Efficiency: High-level Construction unlocks useful features, including the ability to make portable altars, which can enhance prayer training.
- Access to Unique Content: Some quest-related content and minigames require a certain level of Construction.

Getting Started: Levels 1-20

To begin your construction journey, you'll need to gather materials and understand the building process. For levels 1 to 20, the most efficient method is to build furniture that requires minimal resources.

Materials Needed

- Logs: Used for making various wooden furniture items.
- Planks: Obtained by converting logs at a sawmill.
- Nails: Can be crafted or bought from general stores.

Training Method

1. Building Wooden Chairs (Level 1-20):

- Start by building wooden chairs in your house.
- You can build a chair at level 1, which requires 1 log and grants 1 experience point per chair.
- Continue building chairs until level 20.

2. Cost:

- You'll need a total of 19 logs to reach level 20, costing around 2,000 coins depending on the current market price of logs.

Levels 20-40: Advancing Your Skills

Once you reach level 20, you can start building better furniture that provides more experience.

Training Method

1. Building Oak Doors (Level 20-35):

- At level 20, you can begin constructing oak doors. Each door requires 1 oak plank and grants 16 experience points.
- Build these doors until you reach level 35.

2. Building Oak Tables (Level 35-40):

- At level 35, switch to building oak tables which require 2 oak planks and grant 24 experience points each.
- Continue until you reach level 40.

Cost Estimation (Levels 20-40)

- You will need approximately 10 oak logs (5 planks) for doors and 20 oak planks for tables, totaling around 50,000 coins.

Levels 40-70: The Efficient Path to Higher Levels

From levels 40 to 70, players can significantly enhance their experience gains by utilizing more advanced furniture options.

Training Method

1. Building Teak Furniture (Level 40-70):

- At level 40, you can start building teak furniture.

The best options include:

- Teak Tables: 3 teak planks for 40 experience each (recommended until level 50).
- Teak Benches: 4 teak planks for 50 experience each (recommended until level 70).

2. Cost Estimation (Levels 40-70):

- Approximately 150 teak logs are needed for both tables and benches, costing around 1,000,000 coins.

Levels 70-99: Mastering Construction

Once you hit level 70, you can access the best training methods that provide the highest experience rates.

Training Method

1. Building Mahogany Tables (Level 70-99):

- At level 70, switch to mahogany tables, which require 4 mahogany planks and grant 75 experience points each.
- This method is the most efficient way to reach level 99.

2. Building Dungeon Doors:

- Another option is to build dungeon doors, which require 6 planks and grant 100 experience points each.
- This option is less commonly used, as mahogany

tables are more efficient overall.

3. Cost Estimation (Levels 70-99):

- You will need around 1,000 mahogany logs, costing approximately 7,500,000 coins to reach level 99.

Additional Tips for Efficient Training

- Use a House Portal: Having a house portal in your home can save a significant amount of time, allowing for faster access to your construction area.
- Hire a Butler: A servant can help transport items, making the construction process smoother and quicker.
- Join a Clan: Engaging with a clan can provide support and advice, particularly for gathering resources.
- Consider Buying Planks: While you can cut logs yourself, buying planks directly from the sawmill can save time.

Conclusion

Training Construction from level 1 to 99 in OSRS is a rewarding experience that offers numerous benefits to players. By following the methods outlined in this guide, you can efficiently progress through the skill while also enjoying the unique aspects of player-owned housing. Whether you aim to create a beautiful and functional home, access useful utilities, or simply achieve a 99 skill for the sake of completion, the journey through Construction is sure to be memorable. Remember to manage your finances wisely and consider the benefits of investing in high-level construction training methods to achieve your goals efficiently. Happy building!

Frequently Asked Questions

What is the fastest way to achieve level 99 Construction in OSRS?

The fastest way to level 99 Construction is by using the 'Oak Plank' method, where players build oak ladders, which provide a high amount of experience for the materials used.
