Performance Features

The 1994 Suzuki Quadrunner 250 is designed for excellent performance in various conditions. Here's a closer look at some of its performance features:

Engine Performance

The 246cc engine delivers a balance of power and efficiency. The air-cooled, four-stroke design ensures durability while providing sufficient torque for climbing hills and navigating rough terrain. The 5-speed transmission, coupled with the reverse gear, allows for smooth shifting and easy maneuverability.

Suspension and Handling

One of the standout features of the Quadrunner 250 is its suspension system. The independent front suspension with double-wishbone design offers enhanced stability and comfort, allowing riders to traverse bumpy trails effortlessly. The rear swingarm suspension provides additional support and traction, making it a reliable choice for off-road adventures.

Braking System

The braking system consists of front and rear drum brakes, offering reliable stopping power. While modern ATVs may feature hydraulic disc brakes, the drum system on the Quadrunner 250 is sufficient for its intended purpose, providing adequate control while riding.

Design and Comfort

Comfort is paramount in ATV design, and the 1994 Suzuki Quadrunner 250 does not disappoint.

Ergonomics

The seat height of 33.5 inches accommodates a wide range of riders, ensuring that both shorter and taller individuals can ride comfortably. The seating position is designed to offer good visibility and control, enhancing the overall riding experience.

Storage and Utility

The Quadrunner 250 features a front cargo rack and a rear rack, providing ample storage for tools, gear, or personal items. This utility aspect makes it a great option for farmers, hunters, or anyone needing to transport equipment over rough terrain.

Maintenance and Reliability

Maintaining the 1994 Suzuki Quadrunner 250 is relatively straightforward, thanks to its simple design and readily available parts. Here are some maintenance tips to keep this ATV running smoothly:

- **Regular Oil Changes:** Change the oil every 500 miles or as per the owner's manual to keep the engine in good condition.
- **Check the Air Filter:** Inspect and clean the air filter regularly to ensure optimal airflow and prevent engine issues.
- **Inspect Brakes:** Regularly check the brake system and replace the drum pads as necessary.
- **Tire Maintenance:** Check tire pressure and tread condition for safety and performance.
- **Lubricate Moving Parts:** Regular lubrication of the drive chain and suspension components will enhance longevity.

Conclusion

The **1994 Suzuki Quadrunner 250 specs** highlight an ATV that is built for reliability, performance, and versatility. With its robust engine, dependable suspension, and ample storage options, this model is suitable for both recreational riding and practical utility tasks. Whether you're an

experienced rider or a beginner, the Quadrunner 250 offers a well-rounded experience that can adapt to your needs.

For those considering a used ATV, the 1994 Suzuki Quadrunner 250 remains a solid choice, reflecting Suzuki's commitment to quality and performance in the ATV market.
