- Infotainment and Connectivity Features
- Safety and Driver Assistance Technologies
- Performance and Handling Enhancements
- Interior Comfort and Convenience Upgrades

Overview of the 2013 Acura RDX Technology Package

The 2013 Acura RDX Technology Package serves as an optional upgrade to the base and Advance trims, focusing on integrating advanced electronics and driver aids. This package is designed to appeal to customers who prioritize modern technology and enhanced driving safety. It builds upon the RDX's strong foundation of a turbocharged engine and luxury SUV characteristics by adding smart features that improve usability and enjoyment. The Technology Package is part of Acura's ongoing commitment to innovation, offering a blend of hardware and software upgrades.

Included in the package are several key components that work together to create a more connected and secure driving environment. The package is compatible with the vehicle's existing systems and enhances them with more intuitive controls and displays. This approach ensures that drivers can access technology seamlessly without distraction, promoting safer driving practices.

Infotainment and Connectivity Features

The infotainment suite in the 2013 Acura RDX Technology Package is a major highlight, bringing modern conveniences and entertainment options to the forefront. This system centers around an upgraded navigation unit, a premium audio system, and enhanced smartphone integration capabilities. The Technology Package ensures drivers and passengers can stay connected and entertained during every journey.

Navigation System

The integrated navigation system included in the Technology Package offers real-time traffic updates and detailed mapping. It features voice recognition for hands-free operation, allowing drivers to input destinations without diverting their attention. The system's interface is user-friendly, displaying clear route guidance on a high-resolution screen. This navigation setup contributes to efficient route planning and stress-free driving in unfamiliar areas.

Premium Audio and Media

Audio enthusiasts benefit from the inclusion of a premium sound system, typically a 10-speaker Acura/ELS Surround sound system that delivers crisp and immersive sound quality. The system supports multiple media inputs, including CD, auxiliary, USB, and Bluetooth streaming. This flexibility ensures compatibility with various devices and listening preferences.

Connectivity and Smartphone Integration

Bluetooth connectivity is enhanced to support hands-free calling and audio streaming. Additionally, the Technology Package often includes AcuraLink, a connected vehicle platform that provides remote access to vehicle information and concierge services via compatible smartphones. This integration enhances convenience and helps keep drivers informed and entertained.

- High-resolution navigation display
- Voice recognition for navigation and phone
- Premium 10-speaker Acura/ELS Surround audio system
- Bluetooth hands-free and audio streaming
- AcuraLink connected services

Safety and Driver Assistance Technologies

One of the core benefits of the 2013 Acura RDX Technology Package is the suite of safety and driver assistance features designed to reduce risk and enhance driver awareness. These technologies utilize sensors, cameras, and radar to monitor the vehicle's surroundings and provide alerts or automatic interventions when necessary. The package reflects Acura's emphasis on proactive safety measures.

Collision Mitigation Braking System

The Collision Mitigation Braking System (CMBS) is a key component that uses radar sensors to detect obstacles and potential collisions ahead. If a collision risk is identified, the system warns the driver with visual and audio alerts. In critical situations, it can automatically apply the brakes to reduce impact severity or avoid a collision altogether.

Adaptive Cruise Control

Adaptive Cruise Control (ACC) adjusts the vehicle's speed to maintain a safe following distance from the car ahead. This feature works smoothly in highway traffic, reducing driver fatigue and improving safety during long drives. ACC uses radar to monitor distance and speed, applying throttle and brakes as needed.

Lane Keeping Assist System

To help prevent unintentional lane departures, the Lane Keeping Assist System (LKAS) monitors lane markings and provides subtle steering corrections. This system supports driver alertness and contributes to safer highway driving by reducing the risk of drifting out of lanes.

- Collision Mitigation Braking System (CMBS)
- Adaptive Cruise Control with low-speed follow
- Lane Keeping Assist System (LKAS)
- Blind Spot Information System (BSI)
- Rearview camera with dynamic guidelines

Performance and Handling Enhancements

While the 2013 Acura RDX Technology Package primarily focuses on technological and safety upgrades, it complements the vehicle's performance capabilities. The RDX is powered by a 2.3-liter turbocharged inline-4 engine, delivering robust power and responsive acceleration. The technology features work in harmony with the vehicle's dynamic systems to promote a confident driving experience.

Engine and Powertrain

The 2013 RDX's turbocharged engine produces approximately 273 horsepower and 280 lb-ft of torque, enabling swift acceleration and strong passing power. The Technology Package does not directly alter engine performance but enhances driver control through integrated systems such as adaptive cruise control and traction management.

Handling and Stability

The RDX features a well-tuned suspension and available all-wheel drive, providing solid grip and precise handling in various conditions. The Technology Package's safety systems support driving stability by monitoring vehicle positioning and road conditions, helping to prevent skids and loss of control. Together, these elements contribute to a balanced blend of performance and security.

Interior Comfort and Convenience Upgrades

The Technology Package also introduces several interior features aimed at improving overall comfort and convenience for both driver and passengers. These enhancements reflect Acura's commitment to luxury and user-friendly design within the compact luxury crossover segment.

Climate and Seating

The package typically includes dual-zone automatic climate control, allowing individual temperature settings for driver and front passenger. Heated front seats are often standard with the package, enhancing comfort during cold weather. The interior materials are of high quality, with soft-touch surfaces and refined finishes.

Driver Interface and Controls

The Technology Package upgrades the driver interface with an improved multi-information display and intuitive controls for the infotainment and safety systems. Steering wheel-mounted buttons and voice

commands reduce the need for manual input, minimizing distractions. The package also includes keyless entry and push-button start for added convenience.

- Dual-zone automatic climate control
- Heated front seats
- Keyless access system with push-button start
- Multi-information display with vehicle data
- Leather-trimmed seating surfaces (available)

Frequently Asked Questions

What features are included in the 2013 Acura RDX Technology Package?

The 2013 Acura RDX Technology Package includes advanced features such as a navigation system with voice recognition, a premium ELS Surround sound system, AcuraLink real-time traffic and weather updates, and an upgraded rearview camera display.

Does the 2013 Acura RDX Technology Package improve safety?

Yes, the Technology Package enhances safety by integrating a multi-view rearview camera, which helps with parking and reversing, and includes features like AcuraLink emergency call services.

Is the navigation system in the 2013 Acura RDX Technology Package user-friendly?

The navigation system in the 2013 Acura RDX Technology Package is designed to be user-friendly, featuring voice commands and an intuitive interface, making it easier for drivers to access directions and points of interest.

How does the Technology Package affect the audio experience in the 2013 Acura RDX?

The Technology Package upgrades the audio system to an ELS Surround premium sound system, delivering high-quality, immersive audio for a better in-car entertainment experience.

Can I get real-time traffic updates with the 2013 Acura RDX Technology Package?

Yes, the Technology Package includes AcuraLink, which provides real-time traffic, weather, and other updates to help drivers navigate efficiently.

Does the 2013 Acura RDX Technology Package include smartphone integration?

The 2013 Acura RDX Technology Package primarily focuses on navigation and audio upgrades; however, it does not include modern smartphone integration features like Apple CarPlay or Android Auto, which were introduced in later models.

How does the Technology Package impact the resale value of the 2013 Acura RDX?

Having the Technology Package can positively impact the resale value of the 2013 Acura RDX because it adds desirable features such as navigation and premium audio, which are attractive to used car buyers.

Is the rearview camera display enhanced in the 2013 Acura RDX Technology Package?

Yes, the Technology Package enhances the rearview camera display by integrating it into the navigation screen with multiple viewing angles, improving visibility and safety when backing up.

What is the cost difference when buying a 2013 Acura RDX with the Technology Package?

When new, the Technology Package added approximately \$2,000 to the base price of the 2013 Acura RDX, reflecting the additional features like navigation, premium audio, and AcuraLink services.
