Setting and Theme

The game is set in an alternate reality inspired by the works of Sir Arthur Conan Doyle and H.P. Lovecraft. Players take on the roles of various characters, including detectives, agents of the crown, and supernatural beings. The overarching narrative revolves around a mysterious murder that

players must solve while manipulating alliances and leveraging hidden agendas.

Gameplay Mechanics

A Study in Emerald employs several innovative gameplay mechanics that contribute to its strategic depth:

Hidden Roles

One of the core mechanics in A Study in Emerald is the hidden roles system. At the beginning of the game, each player is secretly assigned a role, which can be either a Loyalist or a Restorationist.

- Loyalists: Aim to maintain the status quo and uphold the crown's power.
- Restorationists: Seek to restore the ancient order, often aligning with Lovecraftian entities.

Players must navigate their objectives while keeping their true identities concealed, leading to a game filled with deception and intrigue.

Turn Structure

The game is played over a series of rounds, with each turn consisting of the following phases:

1. Action Phase:

- Players can perform various actions, such as moving to different locations, investigating clues, or collecting resources.
- Strategic planning is essential, as players must balance their personal goals with the actions of others.

2. Event Phase:

- Players draw event cards that can introduce new challenges or rewards, further complicating the gameplay.
- These events can range from spontaneous investigations to supernatural occurrences that affect all players.

3. Resolution Phase:

- Players resolve any ongoing actions and prepare for the next round.
- This phase is crucial for assessing the outcomes of each player's strategies.

Victory Conditions

Victory in A Study in Emerald can be achieved in multiple ways, depending on a player's role:

- Loyalists: Win by accumulating victory points through investigations, maintaining control over critical locations, and successfully completing their objectives.
- Restorationists: Aim to eliminate key Loyalist players and accumulate enough points to claim victory through chaos and manipulation.

This dual victory condition system encourages players to adopt different strategies and adapt their gameplay based on their roles.

Strategies for Success

To excel in A Study in Emerald, players must develop a keen sense of strategy and adaptability. Here are some tips to enhance your gameplay experience:

Understanding Your Role

- Take the time to understand the strengths and weaknesses of your assigned role.
- Adapt your strategies based on whether you are a Loyalist or a Restorationist.

Forming Alliances

- Building temporary alliances with other players can provide advantages, particularly during investigations or resource collection.
- Be cautious, as alliances can shift quickly based on players' changing objectives.

Resource Management

- Keep an eye on your resources, including coins and victory points.
- Plan your moves carefully to ensure you maximize your actions each turn.

Anticipating Opponents' Moves

- Pay attention to other players' actions and try to predict their strategies.
- Observing their movements can provide valuable insights into their hidden roles and objectives.
