Origins and Early History

The origins of the Al Aqsa Mosque date back to the early Islamic period, shortly after the Prophet Muhammad's lifetime. It is located on the Haram al-Sharif, also known as the Temple Mount, a site sacred to Judaism, Christianity, and Islam. The mosque's establishment is closely linked to the event of Isra and Mi'raj, the Night Journey and Ascension of the Prophet Muhammad, during which he is

believed to have traveled from the Sacred Mosque in Mecca to the Al Aqsa Mosque in Jerusalem.

Founding and Early Construction

The initial construction of the mosque is traditionally attributed to the Umayyad Caliph Abd al-Malik or his son Al-Walid I in the late 7th century CE. The original structure was a modest prayer hall and has undergone numerous renovations and reconstructions due to natural disasters and political changes. Early Islamic sources describe the mosque as a significant religious site established to assert Islamic sovereignty over Jerusalem.

Historical Context of Jerusalem

Before the mosque's foundation, Jerusalem was a contested city with immense religious significance for Jews and Christians. The site of Al Aqsa Mosque is believed to coincide with the location of the Second Jewish Temple, destroyed in 70 CE. Islamic rule began in Jerusalem in 637 CE during the Rashidun Caliphate, which set the stage for the mosque's construction and the city's transformation into a prominent center of Islamic worship and governance.

Architectural Evolution

The Al Aqsa Mosque's architectural history reflects a blend of styles influenced by the various dynasties that ruled Jerusalem. Its design and structure have evolved to accommodate religious practices, withstand natural calamities, and symbolize Islamic heritage in the region.

Umayyad and Abbasid Periods

The mosque's initial design featured a large prayer hall with a flat roof supported by columns, surrounded by an open courtyard. During the Abbasid period, the mosque experienced renovations that enhanced its structural stability and decorative elements, incorporating intricate mosaics and

inscriptions.

Fatimid and Crusader Influences

In the 11th century, the Fatimids undertook significant restoration projects, repairing damages caused by earthquakes. However, during the Crusader occupation of Jerusalem (1099–1187), the mosque was converted into a Christian church, with alterations made to its interior to suit Christian liturgical needs. After Saladin recaptured Jerusalem, the mosque was restored to Islamic worship and underwent further expansions.

Mamluk and Ottoman Contributions

The Mamluks and Ottomans contributed extensively to the mosque's current form. The Mamluks added minarets, decorative elements, and reinforced the mosque's structure. Under Ottoman rule, particularly during the reign of Suleiman the Magnificent, the mosque was renovated and expanded, including the refurbishment of its iconic dome and the surrounding plaza.

Architectural Features

- **Dome:** The mosque's dome, originally wooden, was rebuilt with lead covering during Ottoman renovations.
- **Prayer Hall:** The expansive hall accommodates thousands of worshippers and features arches and columns characteristic of Islamic architecture.
