Installation of Avital Car Alarms

Installing an Avital car alarm can seem daunting, but with the right tools and guidance, it can be accomplished. Here are the steps to ensure a successful installation.

Tools Required

- Screwdrivers (flathead and Phillips)
- Wire strippers
- Electrical tape
- A multimeter
- Avital installation manual

Step-by-Step Installation Guide

1. **Read the Manual:** Before starting, thoroughly read the Avital car alarm manual to understand the wiring diagrams and installation instructions specific to your model.
2. **Disconnect the Battery:** Safety first—disconnect the negative terminal of the car battery to prevent any electrical shocks.
3. **Locate the Wiring Harness:** Identify the vehicle's wiring harness where you'll connect the alarm. This is typically found under the dashboard or near the steering column.
4. **Connect the Wires:** Using the diagram provided in your manual, connect the alarm's wires to the corresponding wires in the vehicle's harness. Common connections include:
 - **Power:** Connect the positive wire of the alarm to the car's battery or ignition wire.
 - **Ground:** Attach the ground wire to a suitable grounding point on the vehicle.
 - **Starter Kill:** Connect the starter kill wire to the ignition wire to prevent the vehicle from starting when the alarm is armed.
5. **Install the Siren:** Mount the siren in a discreet location under the hood, ensuring it is secure and not obstructed.
6. **Test the System:** Before reattaching the battery, double-check all connections. Reconnect the battery and test the system by arming and disarming the alarm, and checking the functionality of the remote start and other features.
7. **Secure All Components:** Once testing is complete, tidy up all wires and secure the alarm control unit in a hidden location.
8. **Final Check:** Perform a final check on all alarm functions to ensure everything operates as intended.

Troubleshooting Common Issues

Even with proper installation, issues can arise. Here are some common problems and their solutions.

1. Alarm Does Not Sound
