How to Use the Bora Portamate Saw Guide

Using the Bora Portamate Saw Guide is straightforward, but following the correct steps will ensure you achieve the best results. Here's a simple guide to help you get started:

Step 1: Set Up the Guide

- Unpack the guide and lay it out on a flat surface.
- Extend the guide rail to the desired length for your project.
- Secure it in place using the included clamps to prevent movement during cutting.

Step 2: Adjust the Saw Plate

- Attach the saw plate to your circular saw or jigsaw.
- Ensure that the saw blade aligns with the cutting line on the guide rail.

Step 3: Make the Cut

- Start the saw and carefully guide it along the rail, ensuring that it remains in contact with the guide throughout the cut.
- Maintain a steady pace for a clean and precise cut.

Step 4: Review Your Work

- Once the cut is complete, inspect the result to ensure accuracy.
- Make any necessary adjustments on subsequent cuts based on your observations.

Maintenance Tips for the Bora Portamate Saw Guide

To ensure the longevity and performance of your Bora Portamate Saw Guide, proper maintenance is essential. Here are some tips to keep in mind:

- **Clean Regularly:** After each use, wipe down the guide rail and components to remove dust and debris.
- **Check for Damage:** Regularly inspect the guide for any signs of wear or damage, especially the clamps and rail edges.
- **Store Properly:** When not in use, store the guide in a dry, safe place to prevent bending or damage.
- **Lubricate Moving Parts:** If applicable, apply a lubricant to any moving parts to ensure smooth operation.
