

clear care plus cleaning disinfecting solution

Clear Care Plus cleaning disinfecting solution is a revolutionary product designed for contact lens wearers seeking an effective way to clean and disinfect their lenses. Unlike conventional solutions, Clear Care Plus utilizes a unique hydrogen peroxide-based formula that not only cleans but also disinfects and removes protein buildup, ensuring that your lenses are safe, comfortable, and free from harmful bacteria. In this article, we will explore the benefits, usage instructions, and reasons why Clear Care Plus should be your go-to choice for lens care.

Understanding Clear Care Plus

Clear Care Plus is a specialized cleaning solution that is specifically formulated for all types of contact lenses, including soft, rigid gas permeable (RGP), and silicone hydrogel lenses. Its unique formula sets it apart from other lens care products on the market.

Key Ingredients

The primary ingredient in Clear Care Plus is hydrogen peroxide, which is known for its natural disinfecting properties. This solution also contains a special cleaning agent that helps to break down protein deposits and other debris that can accumulate on lenses. Additionally, Clear Care Plus includes a unique neutralizing system that transforms hydrogen peroxide into a gentle saline solution, making it safe for your eyes.

Benefits of Using Clear Care Plus

Using Clear Care Plus offers numerous advantages for contact lens wearers:

- **Effective Cleaning:** The powerful cleaning action of hydrogen peroxide effectively removes dirt, debris, and protein buildup, ensuring lenses are crystal clear.
- **Superior Disinfection:** Clear Care Plus kills 99.9% of harmful germs and bacteria, reducing the risk of eye infections.
- **Comfort:** By removing protein deposits and other irritants, Clear Care Plus enhances comfort for lens wearers.

- **Convenience:** The one-step cleaning process simplifies lens care, making it easier for users to maintain their eye health.
- **Compatible with Multiple Lens Types:** Clear Care Plus is suitable for various contact lenses, including soft and RGP lenses.

How to Use Clear Care Plus

Using Clear Care Plus is straightforward, but it is crucial to follow the instructions carefully to ensure optimal results and safety. Below are the steps for proper usage:

1. **Wash Your Hands:** Before handling your contact lenses or the solution, wash your hands thoroughly with soap and water.
2. **Rinse Your Lenses:** Remove one lens and rinse it with Clear Care Plus solution for a few seconds to remove any debris.
3. **Clean the Lenses:** Place the lens in the palm of your hand, add a few drops of Clear Care Plus, and gently rub the lens for about 20 seconds to remove any buildup.
4. **Store the Lenses:** Place the cleaned lens in the provided lens case, fill the case with Clear Care Plus solution, and ensure that the lens is fully submerged.
5. **Neutralization Time:** Allow the lenses to soak in the solution for at least 6 hours or overnight to ensure complete neutralization of hydrogen peroxide.
6. **Ready to Wear:** After the soaking period, your lenses are ready to wear. Do not put the solution directly into your eyes.

Safety Precautions

While Clear Care Plus is safe to use for most contact lens wearers, it is essential to follow certain precautions to ensure your eye health:

- **Do Not Use Directly in Eyes:** Clear Care Plus is not an eye drop solution. Always ensure the lenses are neutralized before wearing.

- **Check Expiration Dates:** Always check the expiration date on the bottle before use to ensure effectiveness.
- **Store Properly:** Keep the solution in a cool, dry place, away from direct sunlight.
- **Consult Your Eye Care Professional:** If you experience any discomfort or have specific questions regarding lens care, consult your eye care provider.

Why Choose Clear Care Plus?

With several lens care products available in the market, you may wonder why Clear Care Plus is the best choice. Here are some compelling reasons:

Proven Efficacy

The hydrogen peroxide formula in Clear Care Plus has been clinically proven to kill harmful bacteria and fungi, making it one of the most effective disinfectants available for contact lenses.

Comfort and Clarity

Many users report that lenses cleaned with Clear Care Plus feel fresher and more comfortable throughout the day. The removal of protein deposits and debris leads to a clearer vision and a more pleasant wearing experience.

Trusted Brand

Clear Care Plus is manufactured by a reputable company with years of experience in eye care products. With numerous positive reviews and endorsements from eye care professionals, it is a trusted choice for lens wearers.

Conclusion

In conclusion, **Clear Care Plus cleaning disinfecting solution** is an exceptional product that provides comprehensive cleaning and disinfection for contact lenses. Its powerful formula, ease of use, and proven effectiveness

make it an ideal choice for all contact lens wearers. By following the proper instructions and taking necessary safety precautions, you can maintain the health of your eyes and enjoy clear vision every day. If you haven't yet tried Clear Care Plus, consider making the switch for a better lens care experience.

Frequently Asked Questions

What is Clear Care Plus cleaning and disinfecting solution used for?

Clear Care Plus is primarily used for cleaning and disinfecting contact lenses, ensuring they are free from harmful bacteria and debris while providing a comfortable wearing experience.

How does Clear Care Plus differ from regular contact lens solutions?

Clear Care Plus uses a unique hydrogen peroxide formula that provides a deep clean and effectively disinfects lenses without preservatives, unlike many regular solutions that may contain additives.

Can I use Clear Care Plus with all types of contact lenses?

Clear Care Plus is suitable for most soft contact lenses, including silicone hydrogel lenses, but it should not be used with colored lenses or any lenses that are not approved for hydrogen peroxide cleaning.

What should I do if I accidentally put Clear Care Plus directly in my eyes?

If Clear Care Plus is accidentally placed in your eyes, rinse them immediately with saline solution or water and seek medical attention if irritation persists.

How long should I leave my lenses in Clear Care Plus before wearing them?

Lenses should be left in Clear Care Plus for at least 6 hours to ensure proper disinfection and neutralization of the hydrogen peroxide.

Is Clear Care Plus safe for sensitive eyes?

Yes, Clear Care Plus is generally safe for sensitive eyes since it is

preservative-free, but users should always consult their eye care professional if they have specific concerns.
