Overview of Columbia Business School's Value Investing Philosophy

Columbia Business School value investing philosophy is deeply rooted in the principles established by Benjamin Graham, often regarded as the father of value investing. The school emphasizes a disciplined approach to investing that focuses on intrinsic value, margin of safety, and long-term capital preservation. This philosophy encourages students to analyze companies fundamentally, considering financial statements, market position, and economic conditions before making investment decisions.

At Columbia, value investing is not merely a theoretical construct but a practical framework integrated into the school's broader finance and investment education. The approach teaches students to identify undervalued securities while managing risk prudently, aligning with Warren Buffett's investment strategies, who is also an alumnus of Columbia Business School. This foundational philosophy shapes the curriculum and extracurricular activities, fostering a learning environment that champions analytical rigor and ethical investment practices.
