Setting Up Your Craftsman CR950 Pressure Washer

Setting up your pressure washer correctly is vital to ensure optimal performance and safety. Follow these steps from the manual:

1. **Unboxing:** Carefully remove the pressure washer from its packaging, making sure all components are included.
2. **Assembly:** Attach the handle and wheels according to the assembly instructions provided in the manual. Ensure all screws and fittings are tightly secured.
3. **Connecting the Hose:** Attach the high-pressure hose to the pump outlet and the spray gun. Ensure it's tight to prevent leaks.
4. **Water Supply:** Connect a garden hose to the water inlet, making sure to check for any kinks or blockages.
5. **Power Source:** Plug the pressure washer into a grounded electrical outlet, ensuring the voltage matches the specifications in the manual.

Operating Your Craftsman CR950 Pressure Washer

To achieve the best results, understanding how to operate your Craftsman CR950 is crucial. Here are the steps outlined in the manual:

Starting the Pressure Washer

1. Ensure the water supply is connected and turned on.
2. Turn the pressure washer's power switch to the "ON" position.
3. Squeeze the trigger on the spray gun to release any air trapped in the hose.
4. Once the water flows steadily, you can adjust the pressure settings as needed.

Selecting the Nozzle

Choosing the correct nozzle is essential for effective cleaning. The Craftsman CR950 typically includes:

- **0° Nozzle:** For maximum pressure; best for tough stains.
- **15° Nozzle:** Good for concrete and brick surfaces.
- **25° Nozzle:** Ideal for decks and patios.
- **Soap Nozzle:** Used for applying detergent.

Cleaning Techniques

- Begin cleaning from the top of the surface and work your way down.
- Maintain a consistent distance (usually 12-24 inches) between the nozzle and the surface for best results.
- Use sweeping motions to avoid streaking or damaging surfaces.

Maintenance of Your Craftsman CR950 Pressure Washer

Proper maintenance is vital for the longevity of your pressure washer. Follow these maintenance tips outlined in the manual:

Daily Maintenance

- After use, turn off the pressure washer and disconnect the water supply.
- Squeeze the spray gun trigger to release any trapped pressure.
- Wipe down the exterior to remove any debris or dirt.

Weekly Maintenance

- Inspect the hoses for any signs of wear or damage.
- Clean the filter screen in the water inlet to prevent clogs.
- Check the oil level in the engine and top off if necessary.

Seasonal Maintenance

- Change the oil at the beginning and end of the season.
- Store the pressure washer in a dry place and protect it from extreme temperatures.
- Consider using a fuel stabilizer if storing for an extended period.
